

ADA COUNTY WEED, PEST, AND MOSQUITO ABATEMENT

PROJECT PROFILE

PROJECT OVERVIEW

The project consists of building new facilities for the Weed, Pest, and Mosquito Abatement Department. It is the first construction project for Ada County's new Meridian Campus. The facility has been specifically designed and tailored, based on work flow analysis, to meet the needs of the entire department.

Ada County strives to protect the value of our land and resources by controlling or preventing the spread of noxious weeds and pests. The Weed, Pest, and Mosquito Abatement Department implements cost-effective controls to provide maximum results with the lowest environmental impact.

The new facility was LEED Certified by the US Green Building Council. LEED (Leadership in Energy and Environmental Design) is a national rating system used to develop high-performance, sustainable buildings. LEED emphasizes state-of-the-art strategies for site development, water savings, energy efficiency, materials selection, and indoor environmental quality.

PROJECT HIGHLIGHTS

- Location: 975 E. Pine Meridian, ID
- Facility: Administrative Building and High-Bay Garage for trucks and department equipment
- Architect: Lombard Conrad Architects
- General Contractor: K-J Corporation, Inc.
- Completion: March 2007
- Certification: LEED-NC v 2.1 Silver
- Project Cost: \$2,205,000
- Funding: User fees and property taxes, as established by authority of Idaho Code

PROJECT BENEFITS

- Designed to optimize energy use and work performance
- Energy-efficient lighting and HVAC systems
- Daylight views for building occupants

ENVIRONMENTAL CONSIDERATIONS

- Stormwater management and treatment
- Storage and collection of recyclables
- Low emitting materials, no VOC's
- Designated open space
